Where vehicles are equipped with service indicators, the indicators shall take precedence.
- 5.3.2. Vehicles are required to be serviced by a Mercedes-Benz dealer. As the operator of the vehicle, you are responsible for adhering to the service intervals. Non-adherence to the service requirements as prescribed

(which are model specific), may jeopardise the warranty, negatively impact on the medium to long-term durability, safe optimum operation of the vehicle and ultimate re-sale value. Consequently, warranty claims on vehicles with service interval under or over-runs will be entertained on a merit basis.

Each Mercedes-Benz vehicle needs to be serviced strictly as prescribed in the maintenance schedule in accordance with the warranty terms and conditions, by time/distance limits. The prescribed maintenance needs to be done by a Mercedes-Benz dealer within 1 500km /15 days either way of the prescribed time or distance, whichever event occurs first and only up to 100 000km.

Important note: If your vehicle stands, or is unused for an extended period of time, the prescribed time period service and oil changes still remain applicable. (Including vehicles equipped with service indicators). Where batteries are disconnected or discharged the service indicator will no longer operate correctly, therefore needs to be serviced at least once every 12 months.

Where an electronic service indicator is fitted to the vehicle, the indicator needs to be reset by a Mercedes-Benz dealer at the time of service, in order to indicate the next due service.

As proof that the prescribed service requirements were done by a Mercedes-Benz dealer, the certificates contained in the vehicle service booklet must be duly completed, endorsed and stamped by the dealer.

9. Your Obligations

Your Mercedes-Benz has been equipped with an ASSYST Active Service System (“the system”). This measures the different loads and operating conditions, which your vehicle may be subjected to. The system gauges the engine oil level and condition by evaluating feedback provided from sensors that continuously monitor the oil level, temperatures of oil, coolant and ambient, engine load and speed, as well as road speed. From these inputs appropriate service intervals for the engine are computed. This system therefore ensures that we perform service work only when your Mercedes-Benz actually needs it. Approximately a month before the next service is due, a countdown starts to indicate when the next service deadline is due, as well as the service type necessary. The (Service A or Service B) will be indicated in kilometre (distance based) or days (time based) in the total odometer distance recorder or on the multi-function display, dependent on the vehicle model. The service must be carried out within 1500km/15days either by way of the prescribed distance or time deadline shown or displayed by the ASSYST service indicator and only up to 100 000km.
